SUMMARY

Full Stack Developer focused on building scalable web applications and AI-driven systems. Experienced in FastAPI backend development, React frontend architecture, and integrating computer vision models into practical applications. Built multiple real-world projects including biometric cattle identification systems, full-stack SaaS tools, and dynamic CMS platforms. Strong focus on backend architecture, API design, and production-ready system structure.

EDUCATION

Bachelor of Computer Applications (BCA)

Sep 2024 – Jul 2025

Vivekananda Global University
CGPA: 9.43

WORK EXPERIENCE

Full Stack Developer Intern -PetsGo

Feb 2026 – Present

- Working on the Pranag AI project for livestock management solutions
- Contributing to frontend architecture and backend API planning
- Designing AI-ready system workflows for biometric integration
- Supporting scalable application structure and feature planning

Technical Manager (Web & Digital Systems) -AnukritiPrakashan

Mar 2025 – Dec 2025

- Managed website development and maintenance
- Handled e-commerce functionality and digital infrastructure
- Led technical decisions and deployment processes
- Improved system performance and online operations

Backend Developer Intern -GENZ Awaara

Feb 2025 - May 2025

- Designed and optimized RESTful APIs
- Improved server-side logic and performance
- Collaborated with frontend team for feature integration

Computer Teacher -InfoSphere

Sep 2024 – Aug 2025

- Delivered RS-CIT training and computer fundamentals
- Conducted hands-on practical sessions
- Developed structured training materials

PROJECT EXPERIENCE

Pranag AI – Livestock Management App (Frontend MVP)

- Designed scalable frontend for AI-based cattle identification system
- Structured workflows for biometric and acoustic integration
- Focused on system-ready architecture for ML integr

Biometric Muzzle Identification System

- Built ML-based system for cattle identification using image processing
- Implemented preprocessing, feature extraction, and matching logic
- Used Python, OpenCV, and TensorFlow

CVCraft – Full Stack Resume Builder (FARM Stack)

- Developed resume builder with PDF export
- Built FastAPI backend and React frontend
- Implemented MongoDB data management

Anukriti Prakashan – E-Commerce Website

- Developed book-selling platform with product listing and cart system
- Implemented scalable structure for future payment integration

Hope Paws1and2 – Animal & Road Safety Platform

- Built web platform for incident reporting and service discovery
- Structured backend logic and user workflows

Family Finance Hub – Household Money Management System

- Built a finance management system to track income, expenses, and account transactions.
- Designed structured transaction logic for monitoring household cash flow.
- Implemented backend-driven data handling using Python.

MyAIOS – Android System Architecture Project

- Developed an experimental Android application exploring modular and system-level architecture patterns.
- Implemented structured component separation using Kotlin.

Dynamic Portfolio Website (Admin-Controlled CMS)

- Built a dynamic portfolio platform with database-driven content management.
- Implemented an admin panel to update projects, skills, certificates, and services directly from the frontend without modifying code.
- Designed scalable backend APIs and structured database models for real-time content updates.

ADDITIONAL INFORMATION

- **Technical Skills:**

1. Full Stack Development with Generative AI Integration
2. FARM Stack (FastAPI, React, MongoDB)
3. MERN Stack Fundamentals
4. RESTful API Design & Backend Architecture
5. Computer Vision & Biometric Systems (TensorFlow, OpenCV)
6. Scalable Web Application Architecture
7. E-Commerce System Development
8. Cloud Fundamentals (Microsoft Azure)
9. Database Design & Data Modeling
10. Version Control & Deployment (Git, GitHub)

- **Certifications:**

1. Google Play Academy – Store Listing Certificate
2. Introduction to Generative AI – Google
3. Cloud Systems Software – Georgia Institute of Technology
4. Network Function Virtualization – Georgia Institute of Technology
5. Foundations: Data, Data, Everywhere – Google
6. Full Stack Development with MEAN – Cisco thingQbator_VIT

- **Languages:** English, Hindi
